Address of Applicant :Bundelkhand University, Kanpur Road, Jhansi, Uttar Pradesh, Pin-284128 India Jhansi -----

(57) Abstract :

Increasing stress, depression, anxiety, intolerance, disrespected and value for life is leading a significant population to suicidal tendency all over the world. There are few systems available in the market which claim for assessing the stress level of the individual but either they are centric to one type of population like students, house wives, workers etc. or limited to show the stress levels only. The present invention provides a system (100) for prevention of suicide that estimates the mental stress on the basis of physiological, vocal and internet behavior of the subjects. The system (100) sends alerts according to the stress level to the near and dears, security personnels, and counsellors. The proposed invention is provided with a network of volunteers who may immediately support the candidate in reducing stress and normalizing the condition as per geographic location. Figure 1.
